

Helocast puts small, senior, cleared tiger teams inside government programs to deliver hard technical outcomes — secure agentic AI, DevSecOps, and Kubernetes at scale — on fixed scope and fixed price. We deploy on infrastructure you already own, using open-source tooling you keep, with the authorization evidence your assessors need. We build it, we train your people to run it, and we leave. No staff augmentation. No contract tail. No lock-in.

### CORE COMPETENCIES

- **Agentic AI on your infrastructure** — government-owned agent platforms deployed on your existing Kubernetes environment with vendor-neutral open-source tooling, model-agnostic gateway design, and a full authorization-evidence package (control mappings, SBOMs, hardening documentation).
- **AI development workflow enablement** — your team's tribal knowledge, guardrails, and SOPs encoded into portable agent skills for the AI coding tools you already use, so every developer performs from day one.
- **AI & agent security** — MCP and agent-runtime hardening, sandboxing and egress control, secure RAG/LLM deployment for restricted environments, and agentic SOC architecture with human-in-the-loop guardrails.
- **Kubernetes & platform engineering at scale** — GPU scheduling and utilization, DNS and networking optimization, observability, cost/performance tuning, and AI/ML container hardening to DoD security standards.

### HOW WE ENGAGE

<p><b>0 · DISCOVERY — NO COST</b></p> <p>We interview your developers and leadership, then deliver a written findings brief and proposed roadmap. Yours to keep, whoever you hire.</p>	<p><b>1 · ONBOARDING RUNWAY</b></p> <p>Accounts, access, badging, training — fast, with your expedited support. We absorb context while dependencies clear. The clock starts at access.</p>	<p><b>2 · PROJECT CLOCK</b></p> <p>Fixed scope, fixed price. Written status weekly. First working demo in the first quarter of the clock — week one on a four-week sprint. Then we train your team and extract.</p>

### DIFFERENTIATORS

- ☐ **Built to leave.** Knowledge transfer is a contract deliverable, not a courtesy. The government owns every artifact — platform, code, skills, runbooks, and authorization evidence.
- ☐ **Cleared, veteran-led.** Founded by a U.S. Army combat veteran holding an active TS/SCI, with prior platform and AI experience across DoD software factory, hardened-container, and Joint AI programs.
- ☐ **Senior engineers only.** Every engagement is delivered by 2–5 principal-level engineers with production experience running Kubernetes and security data platforms at extreme scale in global financial services.
- ☐ **Sized for speed.** Engagements run 4 weeks to 6 months, fixed price, structured for simplified acquisition and SDVOSB set-aside and sole-source pathways.

### CREDENTIALS

AWS Solutions Architect – Professional				
AWS Generative AI Developer – Professional				
Claude Certified Architect – Foundations				
Claude Certified Architect – Professional				
Anthropic Partner Network — in progress				
Azure Administrator Associate

### COMPANY DATA

Legal name	Modulagent LLC
DBA	Helocast
UEI	[pending]
CAGE	[pending]
Status	VOSB / SDVOSB (in progress)
Structure	Texas LLC
Programs	NVIDIA Inception member
Accepts acquisition	FFP · OTA · SBIR · simplified

### PRODUCT DELIVERY

Production software shipped by Modulagent LLC:

- ClawFab.io** — AI-agent security infrastructure
- DeskLine.ai** — AI voice agents
- LearnIVO.ai** — AI microlearning (NVIDIA Inception)
- TextMeAndGrow** — SMS platform for small business
- Modutron** —

### NAICS

- 541512 Computer Systems Design (primary)
- 541511 Custom Computer Programming
- 541519 Other Computer Related Services
- 541690 Scientific & Technical Consulting
- 541715 R&D — Engineering
- 518210 Computing Infrastructure
